Fulfillment of Internet Transactions

www.atmsoftware.co.uk

ATM
SOFTWARE

SOFTWARE

Advantages

- Provide **24-hour Internet FX Cash** Fulfilment at Transport Hubs
- Internet Transactions issue a Reference Code which is entered into ATM
- Transaction is fulfilled at ATM with Card used + Reference Code
- Issue any cash amounts without the need for counter / branch service

Technology

- Modern technology and the latest NCR ATM machines. Same technology as offered by major high-street banks
- Wireless Solution Option – No Cable Connections to ATM required. Easy siting of ATM in environments such as airports, ferry ports and railway stations

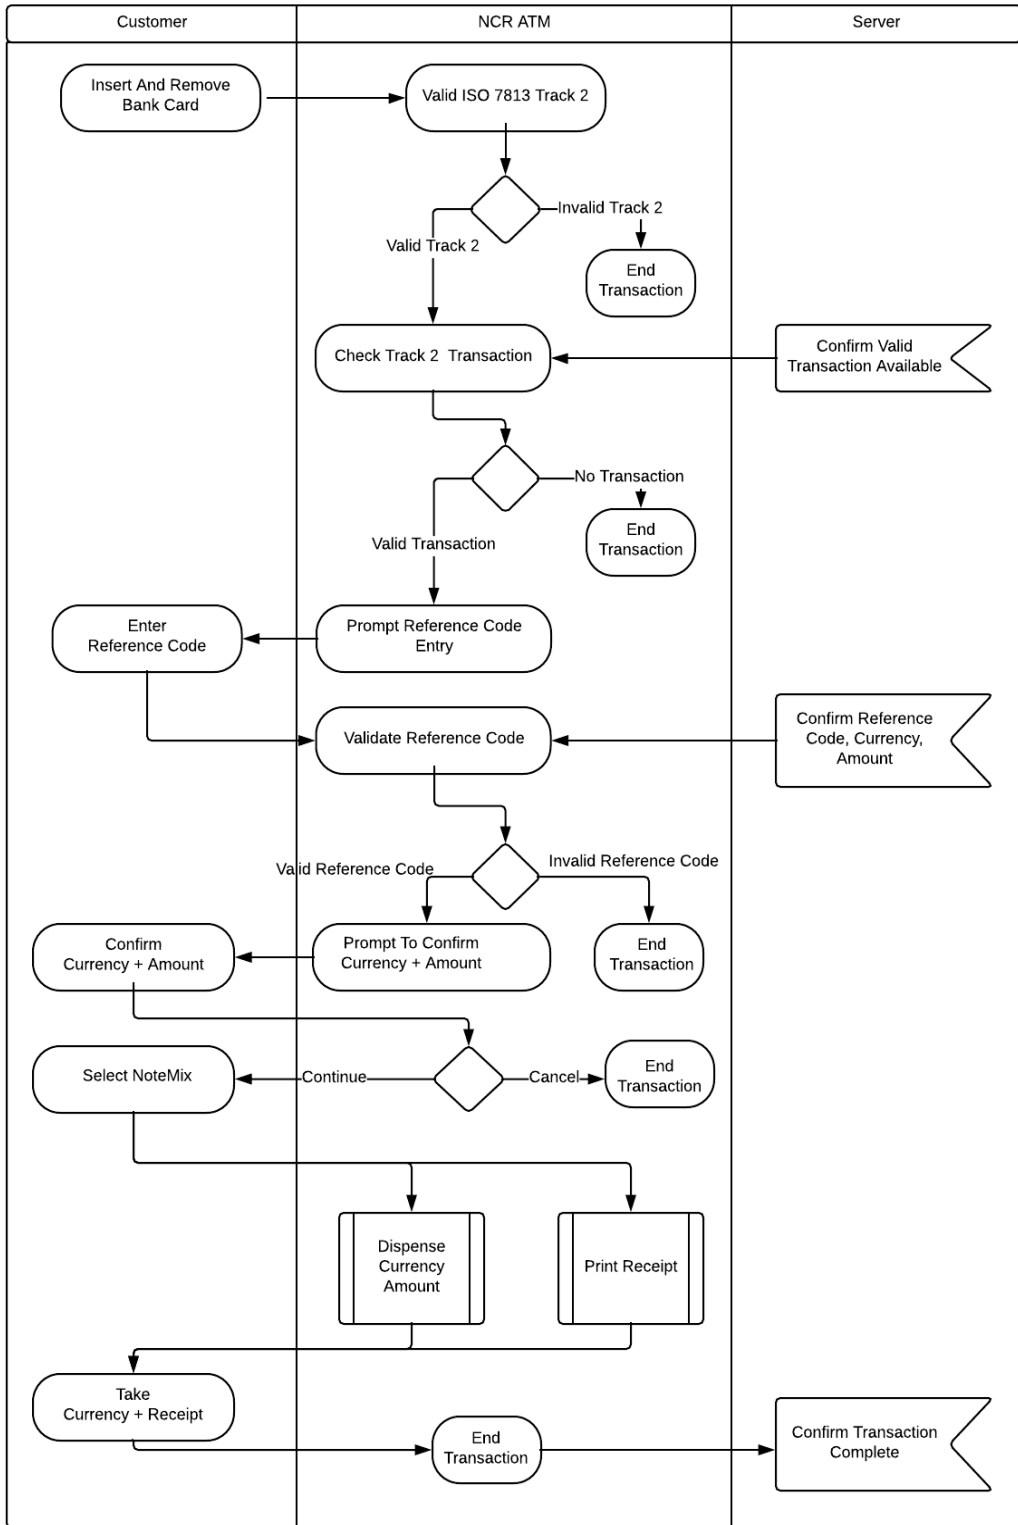

Indoor and Through the Wall

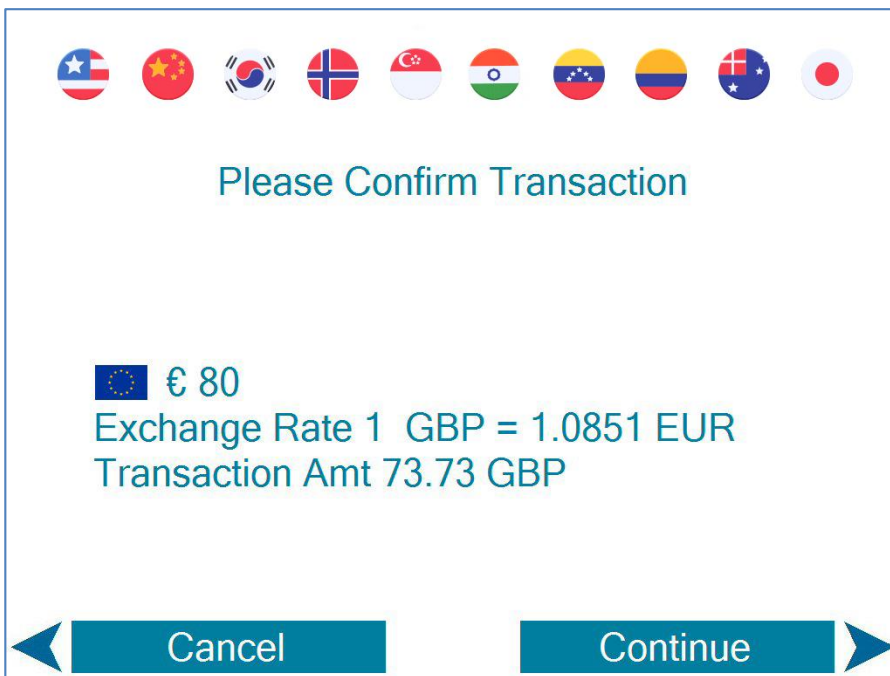

- The NCR SelfServ 22 and 26 Models enhances any interior office space with a minimal footprint. Ideal for very tight locations or where space is at an absolute premium
- The NCR SelfServ 25 is a through-the-wall machine with Dual-Dispense Capability. Up to 8 Cash Cassettes each with a different currency and denomination

Software Solutions

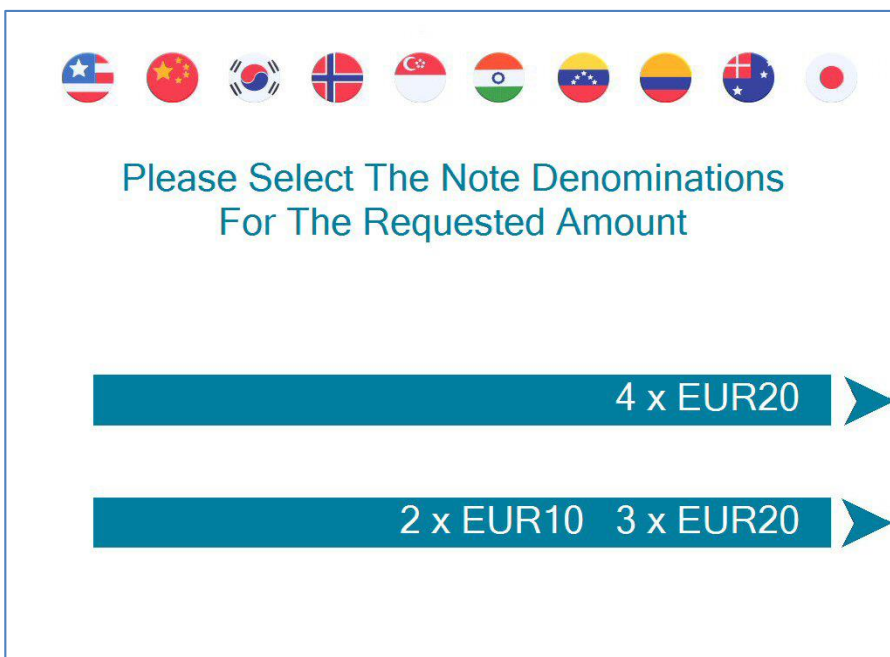

- Unique ATM software solution easily connects to any business system
- Optional Management Station
- ATM becomes a 'Kiosk' fulfilling internet transactions

Special FX Screens – Allow Transaction Confirmation

Special FX Screens – Allow NoteMix Selection

Advantages

- Leverages consumer experience with ATM's
- Same business model as used for issuing of train tickets ordered via Internet
- Bespoke ATM Software Solution with optional Management Station
- Particularly suited to Minor Airports, Train Stations and Ferry hubs which cannot support a manned, 24hr retail presence
- Issue any cash amounts without the need for counter / branch service
