ATM
SOFTWARE

SOFTWARE

Solution

- Windows Touchscreen + Printer Device Software Solution
- Transaction initiated by consumer touching screen
- Complete Messaging system to capture consumer selections
- Black Box authorisation system – separates financial system from kiosk systems
- Complexity of EPOS Certification environment is independent of the Kiosk solution
- EPOS Terminal is independent of the Kiosk, it is connected via the server

Advantages

- Leverages consumer experience with ATM's
- Uses EPOS for authorisation
- Bespoke Kiosk Software Solution with Optional Management Station
- Separates Kiosk from complexity, security, certification of EPOS Device

Physical Architecture

Logical Architecture

Retail
Server

Windows PC,
Touchscreen,
Receipt Printer

Black Box Design
