SOFTWARE

## **DURATION : 2 DAYS**

No knowledge of ATMs is assumed for this course. The course is suitable for candidates who are :

- New to NDC ATM Operations e.g. ATM Software Developers, Operational Support / Monitoring Personnel
- ATM environments which use the NDC Messaging Architecture e.g. KAL Kalignite NDC, APTRA Edge NCR Business Services
- NDC Switch Developers

### **Day 1**

**LESSON 1: INTRODUCTION TO ATMs**  
**LESSON 2: NDC ARCHITECTURE SOLUTION ENVIRONMENT**  
**LESSON 3: NDC MESSAGING**

### **Day 2**

**LESSON 4: SUPERVISOR FUNCTIONS**  
**LESSON 5: TERMINAL CONFIGURATION**

The course, while 'stand up and teach', consists of theory and lots of practical elements. An introduction to basic ATM devices is complemented by using one of the principal ATM software solutions – NDC. The breakdown by lesson is as follows but, the course is designed to have a 'hands-on' feel to include extensive interaction with an ATM running NDC Software

## **LESSON 1: INTRODUCTORY OVERVIEW**

**Purpose :-** This lesson provides an overview of ATM Devices with an introduction to Cash Cassettes, Reject Bins and their associated configuration

ATM Components – Dispenser, Card Reader, Receipt Printer, Keyboard, Encryptor, Operator Panel  
Cassette Types, Reject Bin  
Currency – USD, GBP, EUR  
Currency Denomination – 5, 10, 20, 50, 100  
Note Counts versus Amounts  
Workshop : Configure and Install Cassettes, Clear Reject Bin, Multi-Choice Quiz

## **LESSON 2: NDC Architecture Solution Environment**

**Purpose:-** This lesson describes the NDC Software Solution Environment

How an NDC system works  
The NDC system software  
How the terminal operates overall - Base 24  
The terminal's operating modes  
Communications – TCP/IP  
Workshop : Configure NDC Host System, Multi-Choice Quiz

### **LESSON 3: NDC MESSAGING**

**Purpose:-** This lesson describes the typical message flows in an ATM Environment between the terminal and the host environment

Message overview

Central to ATM Terminal Messages

Downloads

ATM Terminal to Central Messages

Message Flow : Typical Transaction Message Exchange

Workshop : Place ATM In / Out of Service; Send Download; Change Screen Text in Download

### **LESSON 4: SUPERVISOR FUNCTIONS**

**Purpose:-** This lesson describes discusses the NDC Supervisor Mode and associated Menus

Supervisor Interface

Select, Replenish, Configure, Access Menu's

Supervisor Transactions

Journal printer messages, Local error reporting

Workshop : Extract Electronic Journal; Access Diagnostics; Error Logs, Decode Status Messages, Error Screens

## **LESSON 5: TERMINAL CONFIGURATION & SECURITY**

**Purpose :-** This lesson provides an overview of how to configure an ATM for transactions and, describes the security environment in which the ATM operates

State tables, What is a State?  
FITs, Screens, Keyboards  
Configuration parameters  
Local configuration  
Smart Card and Magnetic Stripe Cards  
Message Authentication  
Tamper Indication  
Workshop : Quiz ; Complete a Dummy Sate Table Flow Document
